

Industrial Precision Trusted Performance

At TSL Sealing Solutions Limited, we understand the critical role that reliable sealing plays in the performance and longevity of your machinery. With a comprehensive range of high-quality sealing products, we are dedicated to providing solutions that meet the most demanding industrial applications.

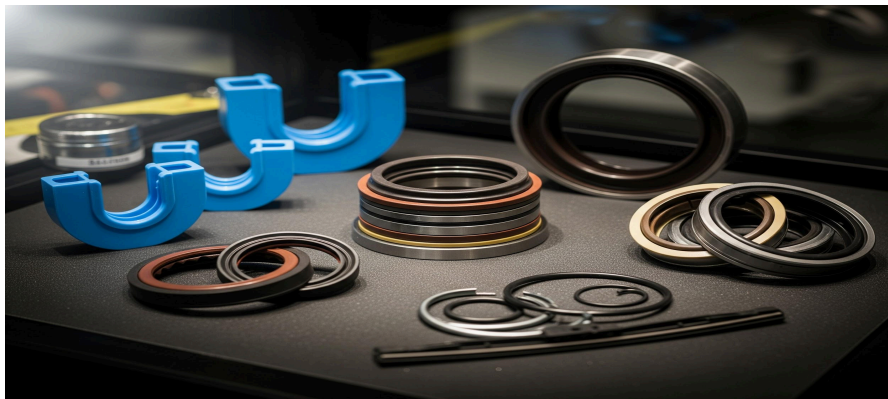

O-Rings

Our O-rings are manufactured to exact specifications, ensuring a perfect seal every time. Available in a wide variety of materials including Nitrile, Viton, EPDM, FFKM and Silicone, they are suitable for diverse temperatures and chemical environments.

Oil Seals

Designed to prevent lubricant leakage and protect against contaminants, our oil seals offer superior performance and durability. We supply a range of profiles and materials to suit your specific rotational and reciprocating applications.

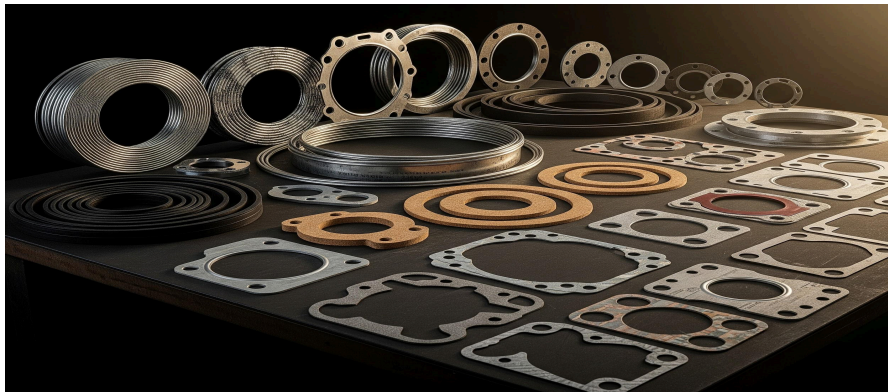

Hydraulic Seals

Ensure optimal hydraulic system performance with our high-quality hydraulic seals. Engineered for both low and high-pressure applications, our seals minimize friction and maximize efficiency, extending the life of your equipment.

Circlips

TSL Sealing Solutions offers a wide selection of internal and external circlips, essential for retaining components on shafts and in bores. Manufactured from high-grade spring steel, they provide secure and reliable fastening.

Gaskets

From standard cut gaskets to custom-made solutions, our range of gaskets provides effective sealing for static applications. We offer materials such as compressed non-asbestos fiber, rubber, and PTFE to suit various media and temperatures.
